

# Greater Lowell Tech students earn kudos at UML contest

UPDATED: 07/26/2019 10:35:05 AM EDT

Ashanti Abreu, above, is one of two juniors at Greater Lowell Technical High School in Tyngsboro who were among the winners of UMass Lowell's recent annual Cool Science Contest, which has students in grades K-12 from across Massachusetts to create artwork that conveys concepts behind climate science. Winning entries were featured inside and on Lowell Regional Transit Authority buses, where they educate thousands of commuters on the subject each day. Judges were impressed with Ashanti's artwork, called "Developing Now: Effects of Global Warming Show." GLTHS student Jack Wilson of Tyngsboro was a runner-up.
